I do not think the readings helped understand the language more because they were too difficult to comprehend (I often did not know more than 2 words in each sentence). The films were helpful. I wish we would have done more casual conversations in small groups that would help us apply the grammatical concepts in every-day conversation. I thought the writing assignments were good practice, but the corrections were too general so I never knew exactly what to fix.

1. **LEARNING:** What have you learned from this course? Consider, **as appropriate**, how the course deepened your critical or analytical abilities, factual knowledge, understanding of concepts, creativity, communication skills, and ability to pursue further work in the subject.

I've, shockingly, learned a lot about the French language. In all seriousness, I think my grasp of the language is a lot better now than it was 4 months ago. We also learned a lot about different cultures, which is always valuable in this globalized world.

2. **YOUR PARTICIPATION:** How would you assess your own effort in the course? How much effort did you expend as compared to your other classes?

It's definitely a course that takes some commitment. To really improve, you should practice at least a little bit every day. The workload is what you make it - you get out only what you put in.

3. **COURSE CONTENT AND FORMAT:** How did the various components of the course contribute to your learning? Consider, **as appropriate**, lectures, readings, writing assignments, problem sets, films, labs, drills, studio work, debates, discussions, presentations, field work, or group work.

The homework/~~teaching-yourself~~ the night before is actually pretty helpful, and a good primer for class. Groupwork is really helpful to put our lessons into practice. The readings and films were really fun and a good way to further complexify our understanding of the language and the cultures we have studied.

WHY did you make the recommendation above?

If you are a French major, obviously I would strongly encourage. I myself am not, and I'm taking this class for the language credit. However, although I was dreading it at the beginning of the semester, it really wasn't so bad, and I ended up learning a lot and enjoying myself.

1. **LEARNING:** What have you learned from this course? Consider, **as appropriate**, how the course deepened your critical or analytical abilities, factual knowledge, understanding of concepts, creativity, communication skills, and ability to pursue further work in the subject.

I learned extensive French grammar and vocabulary and I built well off of French 111. I also improved my communication skills.

2. **YOUR PARTICIPATION:** How would you assess your own effort in the course? How much effort did you expend as compared to your other classes?

I am a Chemical Engineer so naturally the amount of work put into this course and the amount needed were drastically less. I did not find this course hard.

3. **COURSE CONTENT AND FORMAT:** How did the various components of the course contribute to your learning? Consider, **as appropriate**, lectures, readings, writing assignments, problem sets, films, labs, drills, studio work, debates, discussions, presentations, field work, or group work.

The readings helped a lot and the homework and films benefitted me. Lecture and class time did very little except to reinforce what I learned on my own outside of class and give me an opportunity to talk to people in French.

She was great at answering questions and made class time fun. However, the class time was not very useful. Vocab should be practiced and tested more as I don't think my vocabulary grew a ton this semester.

You will learn in this course, however, it isn't hard or challenging. I feel we could have done all that we did in the course in half the time. The teacher makes the class fun however. Vocab should also be used more and tested which it wasn't.
